

# MarcomGather Security Overview

MarcomGather has partnered with Microsoft Azure to provide that your data and business are secure with enterprise-grade protection in datacenters distributed throughout the globe. Although migrating data into the cloud brings new security threats, it also brings new opportunities to add more layers of security. And security is our top priority. Other key benefits include:

**Disaster Recovery** - Minimize disruption to your business with cost-effective backup and disaster recovery solutions.

**Data Redundancy** - Automatically replicate data within geo-specific region.

**IT Compliance** - Avoid misconfigurations, and practice consistent resource governance.

**Business Agility** - No need to worry about IT infrastructure, rapidly adapt to market changes in productive and cost-effective ways.

**Cost Efficiency** - Monitor and analyze cloud spend and optimize cloud resource utilization.

**Elasticity** - Enhance scalability by managing the system's capacity based on the current workload and optimizes performance.

**Active Directory** - A database and set of services that connect users with the network resources they need to get their work done.

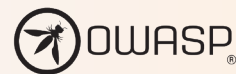

## General Compliance - The MarcomCentral Information Security Management Systems (ISMS) Program adheres to these industry leading frameworks:

The purpose of Special Publication 800-30 is to provide guidance for conducting risk assessments of federal information systems and organizations.

A privacy shield framework for regulating transatlantic exchanges of personal data for commercial purposes between the European Union and the United States.

Software Security. Through community-led open-source software projects, hundreds of local chapters worldwide, tens of thousands of members, and leading educational and training conferences, the OWASP Foundation is the source for developers and technologists to secure the web.

The ISO is a security standard that specifies the requirements for establishing, implementing, maintaining, and continually improving an information security management system, as well as the assessment and treatment of information security risks.
